

MEASURAND : Kinematic viscosity

NOMINAL VALUE : 40 mm²/s at 100 °C

Degrees of equivalence D_i and expanded uncertainty U_i ($k = 2$) expressed in (mm²/s) × 10⁻¹
 $x_R = 39.879$ mm²/s and $u_R = 0.059$ mm²/s

Note: Filled red diamonds indicates the laboratories that maintain an independent scale.
